EXPERIENCE

Software Engineer Intern, **LiveStack**
May 2020 - Jun 2020
- Developed a form in which users can schedule flexible blocks of time for an event using React and Formik
- Created a React component that dynamically generated an outgoing request message based on form details
- Expanded unit and integration tests for front end client and back end server

Processor, **Point Digital Finance**
Jan 2020 - Feb 2020
- Designed a layout to compile data from Salesforce and internal Underwriting system to share with outside partners and contractors

Sortation Associate, **Amazon Logistics**
Oct 2016 - Dec 2017
- Planned and organized delivery routes for contract drivers
- Solved technical and hardware issues regarding Amazon Flex app
- Analyzed and processed returns on undeliverable packages

Freelance Video Producer, **Telegenics Inc**
Jul 2015 – Jun 2017
- Created video assets to support court case testimonials with an emphasis on precision
- Reconstructed accidents with 3D animation using data from police and witness reports
- Learned new skills and technologies to solve the unique problems that each case presented

Freelance Animator, **Zindagi Games**
Apr 2015 – Oct 2015
- Developed 2D and 3D in-game animations for two mobile game titles
- Consistently met tight deadlines while working remotely with minimal supervision

Animation Intern, **Spark Unlimited**
Jun 2013 – Nov 2013
- Developed in-game and cinematic animations for a video game project
